AI ENGINEERING: TensorFlow, Langchain, OpenAI, Anthropic, Claude, Make, Zapier, Botpress, stackAI.

EXPERIENCE

Max.ng, Lagos, Nigeria — *Team-Lead, Frontend Engineering.*

DECEMBER 2021 – PRESENT

- Developed a leave management system for over 30,000 champions, effectively reducing burnout and enhancing work satisfaction by 70%.
- Implemented a fine system for managers to address various offenses including violations such as exceeding distance limits. This initiative resulted in an impressive 80% reduction in incidents.
- Developed a user-friendly web application that streamlines and accelerates the registration process, vehicle requests and psychometric testing.
- Provided mentorship and supervision to 5 interns who participated in a 3-month program as a preparation for their full integration into the team.
- Enhanced the Godview system feature, allowing managers and field agents to access real-time information and track champion vehicles on the map using Google Map API.
- Maintained and optimized code bases for 7 management systems, retrieving data from API endpoints spanning 56 microservices.
- Developed Node.js and expresswebJS APIs to gather extensive statistics of field agents in 20 Nigerian states, minimizing database queries for targeted agent information retrieval.

Kreatesell, Nigeria | Wyoming, United States — *Frontend Engineer.*

OCTOBER 2022 – JANUARY, 2024

- Developed a user interface to help users on Kreatesell verify their bank account information via Paystack and Flutterwave APIs.
- Implemented an affiliate cookie tracking system for users to buy a product using an affiliate link with a 6-month expiration period.
- Developed a robust course and E-learning platform for users on membership plans on Kreatesell.
- Implemented seamless checkout with multiple payment gateways for 37 countries reducing errors and complications by 80%.
- Implemented a coupon generation system to assist creators in offering discounts to users.
- Provided mentorship and supervision to 2 interns who are currently undertaking and successfully handling complex tasks and features on Kreatesell.
- Developed an all-inclusive management system for admins, offering comprehensive information on creators, affiliates, sales, and revenue along with mailing and blog systems for admin officers to create blogs.

Itex Integrated Services, Lagos, Nigeria — *Frontend Engineer.*

JULY 2021 – JANUARY 2022

- Developed the user interface for "Powerdeals" a project that enables users to conveniently pay their electricity bills from all power distribution companies in Nigeria.
- Implemented the switch from Flutterwave to Serbit as the payment gateway integration, successfully reducing costs and improving efficiency as requested based on the business requirements.
- Developed and implemented a comprehensive admin management system within Powerdeals enabling managers to efficiently access and analyze customer data and financial information.

Decagon, Lagos, Nigeria — *Associate Software Engineer.*

JUNE 2021 – DECEMBER 2021

- Worked with a team as a full stack engineer to develop a social networking platform using Node JS, React JS, and MongoDB, for communication among Decadevs.

Parakletus Tech Hub,Ibadan, Nigeria — *Frontend engineer.*

FEBRUARY 2018 – MAY 2022

- Developed educational solutions as a team lead and frontend engineer for a devoted startup creating Paralearn-an e-learning platform that facilitates course sharing and learning among students.

EDUCATION

University of Ibadan, Ibadan, Nigeria — *BSc Hons Physiology*

MAY 2013 – FEBRUARY 2017
